I'm a professional software developer with a Bachelor's degree in Computer Science and a Post-bac in Entrepreneurship. I'm a natural problem-solver with the technical skills to create high-quality solutions. I solve problems correctly with high levels of satisfaction. Currently, I work as a full-time web developer for a Canadian company, and I'm also a part-time freelancer for web development and SAP projects. My portfolio is filled with great feedback for websites, landing pages, and SAP ABAP projects. My skills are divided into Web development and SAP ABAP projects.

SAP ABAP CONSULTANT, CLIENT: GLANTUS

I created and currently provide maintenance to a SAP ABAP extraction program that runs on SAP ECC and SAP S/4HANA. The program extracts all data from the Accounts payable tables and the Supply Chain tables.
